About This Game

How the art can be a source of so many interesting mysteries.

A young artist urgently needs your help to finish her artworks!

THE ART is a puzzle game in which you will have to arrange fragments of the picture in the correct order; as a result, you will be finishing level after level. Therefore you will help the artist finish the pictures, and she, in turn, will gradually dedicate you to her artwork, telling you more about her pictures and her hobby. You will see most of her works, as well as will directly affect her success. Can she manage it or not, this fully depends on you.

PAUSE

One of my best work.
Do you think? Can you?

The Art is a nice puzzle game, very relaxed in its background music and difficulty, with some beautiful pictures. Worth every cent of its cheap asking price.

What a pity it is so short, I wish it had at least three times as many levels - then I would gladly pay a more, too. You can import your own pictures to add more challenges, but that requires having some suitable pictures available. Workshop support would be a cooler way, in my opinion, and would allow talented people to show off their own artwork.
